seating made simple

genius in simplicity. . .

Body Balance is the next generation of ergonomic office seating. Its **weight sensing technology** engineers the simplicity in and the hassle out. Body Balance offers an intuitive, responsive seating experience. The chair **adjusts to your every move** and stops when you stop. **It moves with you** to provide support throughout your workday. Designed so the chair does the work, not you. **So simple**, you wish you'd sat down sooner.

Tracy has never been happier than with Body Balance. Finally a chair that responds to her petite 5'0" frame.

Mark is 6'2" and a former semi-pro athlete. Now he focuses on managing his business and not on the manual describing how to adjust his chair.

Paul is a man in perpetual motion. With Body Balance, he has a chair that keeps up with him by using weight-activated counterbalance technology to provide the ideal seating posture – however he moves.

freeing you from limits.

The **Body Balance** mechanism allows the chair to automatically adjust to each user, whether 100 pounds or 300 pounds, resulting in **ultimate ergonomic comfort** and the most advanced sitting experience known to humankind. Ok, that part was a stretch. But whether for task or executive, conference or training, Body Balance helps reduce workplace injuries and stress by removing user error.

A simple dual-function lever that adjusts seat height and allows the user to control the recline settings.

Automatic tension adjustment ensures optimum back support during all stages of recline.

Body Balance ensures perfect balance for every user during recline.

So how does it work?
Easy. Just sit down.

intuitively simple.

Today's workplaces need chairs that are as flexible, responsive, and intelligent as the people who sit in them. Body Balance provides intuitive, effortless support for all the ways we work and sit. Using innovative technology typical of the high-end seating market, Body Balance offers **extraordinary performance at mid-market prices.**

Body Balance is available on InSync, InTouch, Revel, HB, Emme and Bolero.
