## PATIENTS, GUESTS, AND CAREGIVERS

coexist perpetually in healthcare spaces and the road to recovery leads each to many different places. In order to create positive outcomes, it is important everyone along the way has the smart, comfortable support they need for better experiences.

# AT THE END OF THE DAY

healthcare spaces ought to make the bad days better and the good days great for everyone involved. Spaces should convey comfort, wellness, and security; therefore, contributing to patient healing, guest contentment, and prideful caregivers ready to recharge and do it all over again.

## A SENSE OF HOMEFULNESS

Furniture should connect users to the spaces around them and allow them to be present in the moment, enhancing their care experience.

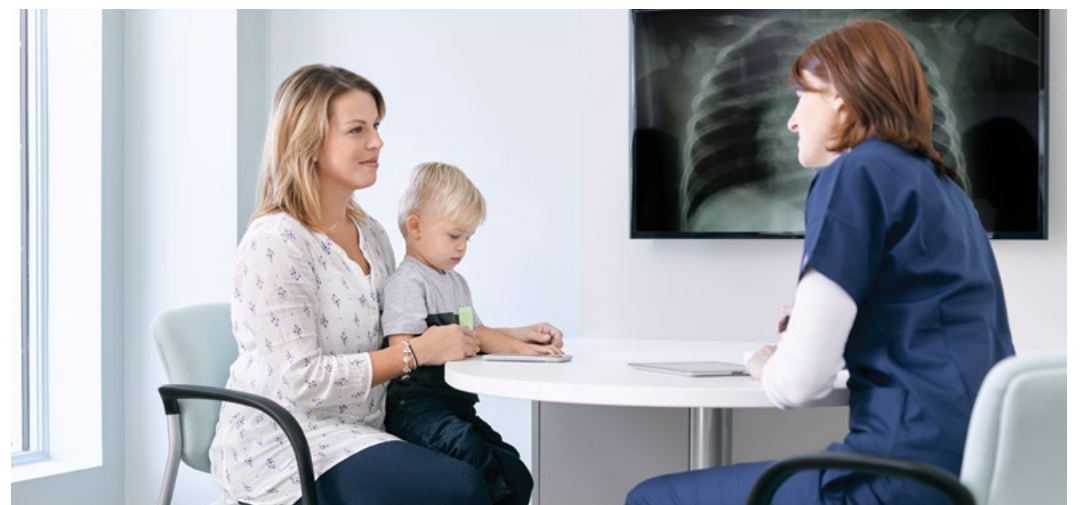

## IT'S MORE THAN JUST BEDSIDE MANNER

It's about creating spaces that positively support relationships between patients and caregivers. Helping them navigate the best possible path towards wellness and a better life.

## CARE INFORMATICS SHED LIGHT

on the measurements that reduce incidents and re-admittance, as well as inform the design on how to keep caregivers as efficient and refreshed as possible in the delivery of healthcare.
