**Frame Construction**

Bench	• The frame is constructed of furniture grade plywood and interior grade hardwoods. Corners are notched and slotted and glued and stapled into position
Bench Seat	• The hardwood plywood seat includes 2 layers of Polypropylene webbing. A 2.5" thickness of multiple layer high resilient Polyurethane foam that has a density of 3 lb./cu. ft. is placed on the seat
Bench Back	• The back is covered with a 1.5" thickness of Polyurethane foam that has a density of 1.8 lb./cu. ft.
Bench Box	• The bench box is covered with a ¼" thickness of Polyurethane foam that has a density of 1.8 lb./cu. ft.
Surround	• The frame is constructed of hardwood plywood, MDF and interior grade hardwoods. Corners are lapped, glued and stapled into position. The top, sides and ends are covered with a ¼" thickness of Polyurethane foam that has a density of 1.8 lb./cu. ft.
Outside	• The outside surround panels are available in finished veneer or upholstered
Legs	• The unit includes black nylon levelers
Upholstery	• All fabric and leather pieces are cut with automated cutters that utilize precise patterns
Tablet	• The tablet is available in finished veneer or 3D laminate
Power	• The power unit contains 2 USB charging ports and 1 AC plug-in. The power is available in 3 colors and is also available as a plug-in or hardwired
Privacy Screen	• The unit is available without a privacy screen, with a frosted acrylic privacy screen or a charcoal colored PET privacy screen

**Foam**

Seat/Back	• Premium grade foam
